One Chance

Bringing people together for a brighter tomorrow

About Earth Day

The first Earth Day was held on April 22nd, 1970. Earth Day was founded by Gaylord Nelson, a US Senator from Wisconsin.

Earth Day is a time to celebrate gains we have made and create new visions to accelerate environmental progress. Earth Day is a time to unite around new actions. Earth Day and every day is a time to act to protect our planet.

Our goal for this Earth Day Festival is to bring people together for a brighter tomorrow. All organizations involved have a passion for protecting our natural resources and environment. This festival is our way to educate the public on ways to protect our environment and the importance of Earth Day.
