# About EARTH DAY

The first **Earth Day** was held on April 22, 1970. **Earth Day** was founded by Gaylord Nelson, a U.S. Senator from Wisconsin. People all over the country made promises to help the environment. Everyone got involved and since then, **Earth Day** has spread all over the planet.

**Earth Day** is a time to celebrate gains we have made and create new visions to accelerate environmental progress. **Earth Day** is a time to unite around new actions. **Earth Day** and every day is a time to act to protect our planet.

Our goal for this **Earth Day** Festival is to bring people together for a brighter tomorrow. All organizations involved have a passion for protecting our natural resources and environment. This festival is our way to educate the public on ways to protect our environment and on the importance of **Earth Day**.
